

Title: SYSTEMS FOR ELECTRONIC TRADING

ABSTRACT

Systems are provided to manage option information. According to some embodiments, a user interface is provided including at least one option quote area  
5 presenting a plurality of option quotes, and an order entry area comprising input areas for inputting two or more option orders. A selection of one of the presented plurality of option quotes may be received and details of an option order corresponding to the selected option quote may be presented in appropriate input areas of the order entry area. In some aspects, a number of option quotes to present in at least one of the at least one  
10 option quote area is received, and the number of option quotes is presented in the at least one of the at least one option quote area.
